

KeyBox 9550 SC

Intelligent KeyBox for wall mounting with key identification for monitoring and controlling each and every key. Holds a maximum of 210 keys but can be equipped with fewer positions or expanded if needed. Opportunity to expand capacity further by connecting expansion cabinets. Individual login via PIN-code, card reader or PIN/card in combination to increase security.

Key management is administered with the cloud service KeyWin. In KeyWin you will have complete traceability of keys and users via a functional and user-friendly interface.
